

HYPACK 2026 Sydney Workshop

Once again, we are pleased to invite members of the HYPACK Community to the 17th Australian Users Workshop in Sydney.

Choose to come for Single Beam only (Day 1), Multibeam only (Day 2&3) or all 3 days.

John Lindberg from HYPACK will be back to take you through all the HYPACK changes and new features as well as covering user suggested topics.

Participants will have the opportunity to discuss methods and solutions to project requirements with HYPACK, CEE HydroSystems staff, along with other users.

Participants are invited to attend a field demonstration of the new CEE USV autonomous survey vessel, running HYPACK software.

We will also be hosting our workshop dinner on the Tuesday night.

As always, we can create a custom training program to focus in more detail on your particular application. For more details, please contact our office or this topic can be discussed in more detail during the workshop.
